

Apple iPhone User Guide - Sample

1. Resetting your iPhone:

To reset your iPhone, go to Settings > General > Transfer or Reset iPhone > Erase All Content and Settings.

This will return the device to factory condition. Make sure to back up your data before resetting.

2. Forgot Passcode:

If you forgot your passcode, you need to use iTunes or Finder to reset your iPhone.

Connect it to your computer and follow on-screen instructions after entering recovery mode.

3. Software Update:

To update your iPhone software: Open Settings > General > Software Update and follow prompts.

Ensure the phone is connected to Wi-Fi and has sufficient battery.

4. Backing Up Your iPhone:

Use iCloud or iTunes to back up your iPhone. Go to Settings > [your name] > iCloud > iCloud Backup, then tap Back Up Now.

5. Face ID and Passcode:

To configure Face ID, go to Settings > Face ID & Passcode. Follow the on-screen instructions to complete setup.
